Hazardous Material Release - Long Beach, Los Angeles County: (Spill Report 18-4131)

At 2135 hours, 06/22/18 the California State Warning Center received report of a discharge of an unknown amount of production water (petroleum product) from an injection line on an above ground pipeline. The release occurred in Long Beach, Los Angeles County, at the Hwy 47 thruway on-ramp at the Henry Ford southbound on-ramp.

- The last update from LA County Fire Department Hazmat indicated that they are still attempting to determine the amount of the release; however, it is about the size of a football field. The release did enter a storm drain catch basin; however, at this point it is believed that no waterway has been affected. LA County Fire Department Hazmat indicated that they will provide further updates as they become available.
- CSWC personnel conducted notifications per SOP.

Proclamation

Imperial County: On 06/22/18 at 1810 hours, the California State Warning Center received notification that Imperial County adopted a resolution proclaiming a local emergency due to a Mud Pot 5 miles northwest of the town of Niland. The County is not requesting any state assistance in the proclamation. The purpose of the proclamation is for the following:

- Procurement of necessary equipment, services, and supplies for the purpose of addressing the mud pot repairs, and activation of pre-established local emergency provisions such as special purchasing and contracting; and provides authority to the Imperial County Public Works Department to conduct repairs under an emergency basis.

WEATHER OF CONCERN

Weather of Concern

Northern California:

- An Excessive Heat Watch is in effect for much of the Northern California inland region through Sunday.
- Multiple counties have Red Flag warnings through Sunday.

Central California:

- High temperatures will be above the century mark over much of the San Joaquin Valley through Sunday.

Bay Area:

- Red Flag Warnings for multiple coastal counties through Sunday.
- Heat Advisories in place for multiple coastal counties during the day on Saturday, 06/23/18.

Southern California:

- Gradual cooling will take place over the weekend.
- High pressure will bring warming for Monday through Tuesday and Wednesday with the marine layer becoming shallower.

Operational Area Contingency Actions

- Please see attached for Cal OES Inland Region Heat Contingency Plan.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

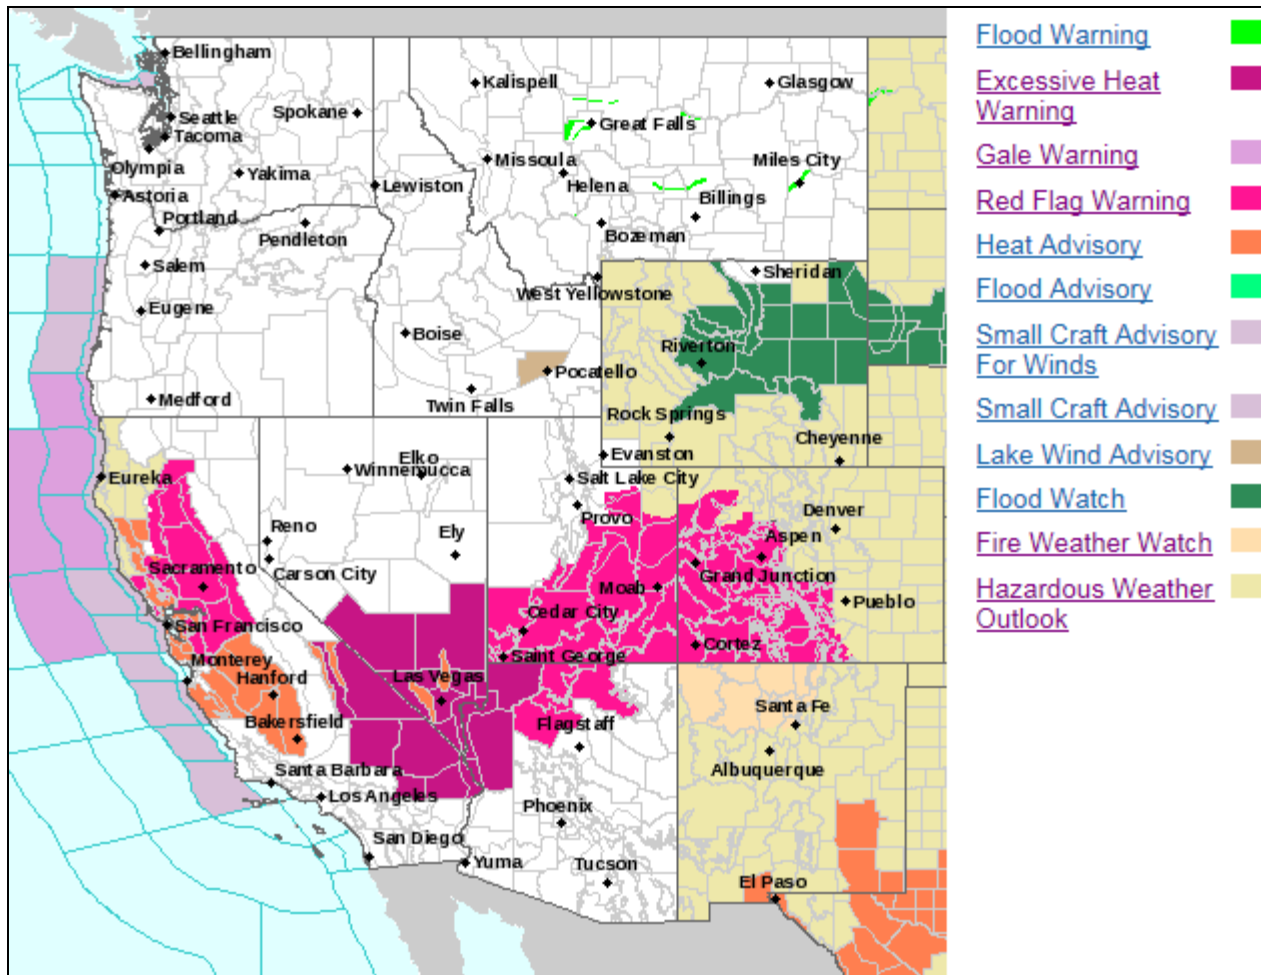

Hot and dry weather is forecast through the weekend. Temperatures are expected to return to near normal next week. Maximum temperatures during this heat wave are expected to peak out between 105-110, with the hottest expected in the Northern Sacramento Valley, Red Bluff/Redding area today and Sunday. The San Joaquin Valley is forecast to experience dry weather for the next several days. High temperatures will be well above normal through at least Tuesday or Wednesday. A trend to cooler weather is likely later next week. The Bay Area is expected to experience very warm to hot temperatures across the interior today as high pressure dominates the weather pattern. Additionally, offshore winds will develop and result in heightened fire weather concerns for portions of the region today through Sunday. Cooling is then expected by Sunday and into early in the upcoming week with increased onshore flow.

SOUTHERN CALIFORNIA

High pressure aloft will bring warming for Monday through Tuesday and Wednesday with the marine layer becoming shallower. For Thursday into next weekend, a trough of low pressure near the West Coast will strengthen the onshore flow spreading cooling inland and deepening the marine layer for Friday into next weekend. Further southeast, temperatures closer to seasonal normal can be expected through Monday as high pressure weakens across the Southwest. Another warmup is expected Tuesday and Wednesday, with high temperatures forecast to be near 110 degrees across the lower deserts.
